

# HOME SOLAR POWER GENERATION SALES

Solar Generators. A solar generator works when a solar panel converts sunlight into direct current (DC) electricity that passes through the charge controller. Then, the solar energy is stored inside the battery. The inverter turns the electricity into accessible alternating current (AC) power.

A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is evidence homes with solar panels sell faster than those without.

A solar powered whole home generator sizing between 2000 and 3000 watts is generally adequate to meet the essential needs of a typical family, powering lights, small appliances, electronics, and a refrigerator during power outages or off-grid scenarios.

Power Your Home or Business with Solar Energy Solarpro offers high quality solar systems that are expandable, efficient and cost-effective. Help reduce emissions with our smart solar solutions and secure your future energy ???
