Does home assistant integrate with OpenWeatherMap & solar assistant? I already had Home Assistant integrated with OpenWeatherMap and Solar Assistant. Yesterday I setup an automation with an OpenWeather Trigger to have Solar Assistant change the Growatt to Utility Priority to fully charge the batteries at 50% precipitation forecast.

Does solarassistant integrate with home assistant? SolarAssistant can integrate with Home Assistant via MQTT and supports the Home Assistant auto discovery protocol.

Can solar assistant integrate with Shelley? Real-time charts, analytics and power management from via a Raspberry pi - the most powerful, cost effective device on the planet. I see that I can add a current transformer setup with Shelley, but I???d really love for Solar Assistant to integrate. I???m attaching a small typical screenshot of SA, for those of you not familiar with it.

How do I install solar optimizer in home assistant? Install HACS. This way you get updates automatically. Add this Github repo as a custom repo in HACS settings. Find and install "Solar Optimizer" in HACS and click "Install". Restart Home Assistant. Then you can add the Solar Optimizer integration in the integration page. You can only install one Solar Optimizer integration.

Does home assistant support CT clamp sensors? In Home Assistant we have support for off-the-shelf CT clamp sensors or you can build your own. The off-the-shelf solution that we advise is the Shelly EM. The device has a local API, updates are pushed to Home Assistant and it has a high quality integration.

How do I restart my home assistant? Once it is installed, you'll probably notice a notification pop up on Settings: Click on settings, and you should see a Repair notification for Restart required: If you don't see this (you might be running an older version of Home Assistant), navigate to System, Settings, click on the power icon, and Restart Home Assistant.

I'm trying to link HA and SA. I'm using the guide on Home Assistant broker setup with SolarAssistant I have successfully finished up to end of step 4. When I try and Subscribe to the # topic (last step). You should see SolarAssistant messages appear. I don't see any messages come through. I know this might be very difficult to know what's wrong??? any ideas? I got a ???

Hi everyone, Hoping someone might be able to help. I've got Solar PV along with Growatt batteries with a Growatt SPA inverter. I've had solar assistant installed for around a year and connected it to Home Assistant via MQTT. I'm looking to set up some automations, rather than having to use the Growatt App, however not having much luck. I have the following ???

# HONG KONG SOLAR ASSISTANT HOME ASSISTANT

I hear many people use Solar Assistant in combination with Home Assistant. Why have Solar Assistant in the middle if the data can be sent straight to Home Assistant with a much more customizable experience? My best guess is the ease of setup, support for many inverters / BMS, and remote inverter configuration.

A second home on campus. Before coming to Hong Kong, Prof. Zhou completed his PhD degree in materials science and engineering at Brown University in the United States, then kicked off his career as a research assistant professor there.
