Where will stationary energy storage be available in 2030? The largest markets for stationary energy storage in 2030 are projected to be in North America(41.1 GWh),China (32.6 GWh),and Europe (31.2 GWh). Excluding China,Japan (2.3 GWh) and South Korea (1.2 GWh) comprise a large part of the rest of the Asian market.

Will energy storage capacity grow in 2022? BNEF estimates that energy storage capacity worldwide needs to grow by a factor of 16.1 times from the end of 2022,to 720 gigawatts by 2030,to support a global target to triple renewables that is under discussion ahead of COP28.

How much storage capacity is needed? Some analysis suggests that a few terawatt-hours(TWh) of storage capacity is needed ,but seasonal variation requires long-duration storage of up to more than a month. The long-duration needs will significantly increase both the storage capacity needed and the cost of storage.
