On the other hand, panels on the ground can interfere with your home's overall aesthetic more than they would on the roof. Installation of ground panels also takes significantly more time and effort and is generally more expensive than rooftop panels.

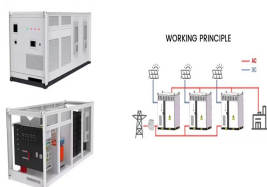

A solar panel system typically generates double its "size". For example, a standard "4 kilowatt peak" (kWp) solar panel system could generate around 8kWh of electricity in a day (weather-dependent). Therefore, you'd want a battery that has a maximum capacity of 8kWh to store all the energy your solar system could potentially produce.
