

HOW TO MAKE MONEY BY STORING ENERGY IN POWER CABINETS

Why is battery storage growing in the UK? The UK government's commitment to reaching net zero carbon emissions by 2050 continues to be a huge driver for the growth of battery storage. As the demands being placed on the grid continue to increase, with the decarbonisation of the heat and transport sectors, this means more and more renewable energy will be needed.

How do battery operators make money? Battery operators can earn revenue by participating in the BM and helping National Grid balance the network, by charging or discharging power to move energy where it is needed. As the BM is an ad hoc way for National Grid to utilise flexibility with little forward commitment, the financial rewards can fluctuate.

How do batteries help a grid? Balancing the system??? Batteries can help balance the grid, by storing energy at times of low demand and releasing it at times of high demand, when it is most needed (usually morning and afternoon peaks respectively). Ancillary services reward battery operators for supporting grid stability by helping keep grid frequency at required levels.

How can battery asset owners be financially rewarded? Battery asset owners can be financially rewarded for helping manage such incidents. Firstly, by being on standby and available to react, and secondly through utilisation payments that may also be available depending on lower capital costs and strengthening revenue forecasts have both helped boost investor confidence. on the type of service.
