

HUASHUN PHOTOVOLTAIC PANEL

Solar Panels Thermal Ranges. The thermal performance of the SH-280P6-20 solar panels from Huashun Solar Energy Technology ensures their reliability and efficiency across varying temperature conditions.. These panels are designed to operate optimally within a wide operating temperature range of -40~85 °C. Additionally, the temperature coefficients of the panels, such as a_1 and a_2 , are designed to be low, typically around -0.25% to -0.35% per degree Celsius, to maintain high efficiency even at higher temperatures.

We are specialized in producing and selling solar cells, solar panels, on-grid and off-grid solar power plants. Huashun Solar invest 250 million yuan to build a modern industrial park, which have factory area of 50,000 square meters and the newest automatic production line of solar modules. The solar panel production capacity have increased

Due to its leading power and efficiency performance, Huashun HJT PV module can effectively reduce the system BOS cost and result in lower LCOE. Learn More HJT Solar Cell N-type wafer which make HJT solar panel as one of the best in the industry.

Heterojunction with intrinsic thin-layer, known as HJT, is a N-type bifacial cell technology, which uses N-type monocrystalline silicon as a substratum and deposits silicon-based thin films with different characteristics and transparent conductive films on both sides.

HUASHUN PHOTOVOLTAIC PANEL

Ningbo Huashun Solar Energy Technology Co., Ltd. Which is established in the end of 2004, we are focusing on manufacture, sale and service of crystalline silicon solar cells, modules, PV system and PV related products.

Company Introduction: Ningbo Huashun Solar Energy Technology Co., Ltd. is located in Ningbo, Which is one of the biggest sea ports in China. We are a high-tech enterprise that is committed to developing green-clean and renewable energy, specialized in producing and selling the solar cells, solar panels, on-grid and off-grid Solar power plants.
