

INDIA SOLAR ENERGY WESTECH

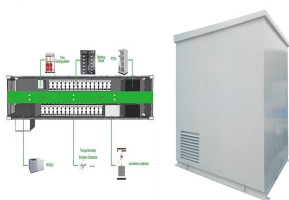

Which company has secured India's largest solar energy & battery energy storage system? Reliance NU Suntech, a subsidiary of Reliance Power, has secured India's largest solar energy and battery energy storage system (BESS) project at 930 MW (megawatts) from the Solar Energy Corporation of India (SECI), according to an exchange filing.

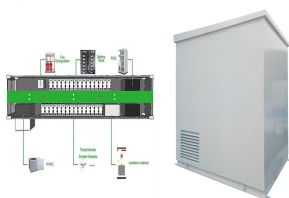

How much does a solar energy storage system cost in India? Even the recently approved power tariff for new RE plus storage plants, tendered by the Solar Energy Corporation of India, had the winning bids for co-located solar and Battery Energy Storage Systems (BESS) ranging from 6.15 to 6.85 Rs/kWh for peak power supply and 2.88 Rs/kWh for off-peak supply.

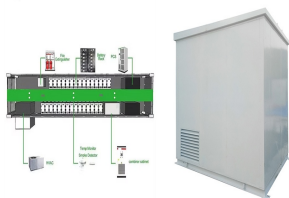

Will SECI buy solar power from Reliance NU Suntech? SECI will enter into a power purchase agreement with Reliance NU Suntech for 25 years and the solar power procured will be sold to multiple discoms in India. Reliance NU Suntech will develop the project on a build-own-operate basis.

Why is solar energy storage important in India? The energy storage system ensures a steady power supply even during low solar generation. This initiative strengthens India's renewable energy capacity, reduces reliance on fossil fuels, and solidifies Reliance NU Suntech's position in the power generation sector.

How much solar power does Reliance NU Suntech need? The terms of the tender dictate that Reliance NU Suntech will also have to install a minimum storage capacity of 465 MW/1,860 MWh charged by solar power. This marks the single largest solar and BESS project in India, designed to deliver peak power for four hours daily (or a four-hour discharge duration).

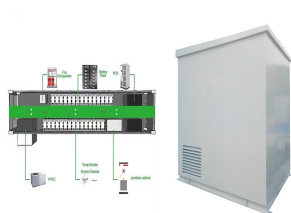

Who won SECI contract for 930 MW solar project? Reliance NU Suntech emerged as the winner, securing the largest individual allocation of 930 MW from a pool of five companies bidding for a total capacity of 2,000 MW of interstate transmission system (ISTS)-connected solar projects.

Another critical initiative underlining India's commitment to solar energy is the Solar Park Scheme, designed to establish 50 Solar Parks of 500 MW and above with a cumulative capacity of ~38 GW by 2025-26. These solar parks act as hubs for solar energy generation, attracting investments and fostering a conducive environment for solar power

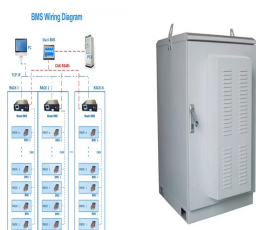

4 ? The move is aimed at addressing the intermittency of the rapidly growing share of renewable energy in India's electricity mix and ensuring an around-the-clock power supply. ???

Firma Westech Solar Energy GmbH Mit mehr als 10 Jahren Erfahrung ist die Westech-Solar Energy GmbH ein kompetenter Partner auf dem Markt für erneuerbare Energien. Diese Erfahrungen möchten wir mit Ihnen teilen und Sie mit hochwertigen Produkten versorgen. Unsere Mitarbeiter arbeiten von Deutschland und Österreich aus, um Ihnen als kompetenter und zuverlässiger Partner zu sein.

Regulatorul solar Westech 3T1 (Resol CS 2) poate controla un panou sau un camp de panouri solare si un boiler. Aceasta automatizare se poate utiliza la grupurile de pompare clasice dar si la controlul pompelor cu turatie variabila de inalta eficienta PWM cu care sunt echipate instalatiile solare de ultima generatie. Controlerul Westech 3T1 are

Westech Solar Energy GmbH. With more than 10 years of experience, Westech-Solar Energy GmbH is a competent partner in the market for renewable energies. We would like to share these experiences with you and provide you with high-quality products. Our employees work from Germany and Austria to be at your side as a competent and reliable partner.

We will also see the Solar energy potential of India, India's installed solar energy capacity, various measures taken by the government to promote solar energy, and the various challenges in the adoption of solar energy. Coal currently accounts for about 55% of India's energy requirements. However, this results in significant greenhouse gas

Case in point, the country's total solar potential is a massive 748 GW as per the National Institute of Solar Energy. Further, the National Institute of Wind Energy estimates the wind power potential at 695.50 GW at 120 meter and 1,163.9 GW at 150 meter above ground level for just onshore wind. Growing renewable energy capacity: India's
