What is solarplaza summit Italy? Join us in Rome on July 10,2025,for Solarplaza Summit Italy: Solar &Storage: with its focus on high-level dialogue and actionable outcomes,the summit reaffirms Italy's position as a frontrunner in renewable energy innovation and integration,setting the stage for a future powered by clean,reliable,and sustainable energy solutions.

Is Italy a good market for energy storage? Right now,Italy is one of the most attractive energy storage systems markets. According to the Italian Transmission Operator (TSO) Terna the grid needs about 71 GWh of new utility-scale storage capacity by 2030 for the country to decarbonize its energy system and align with EU targets.

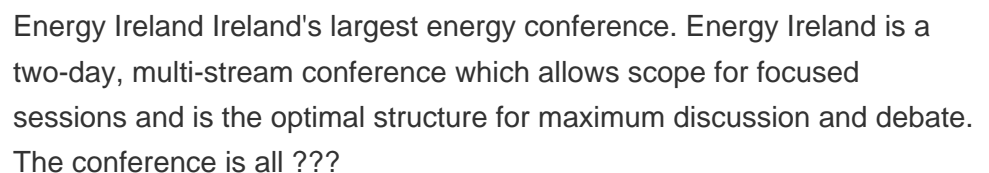

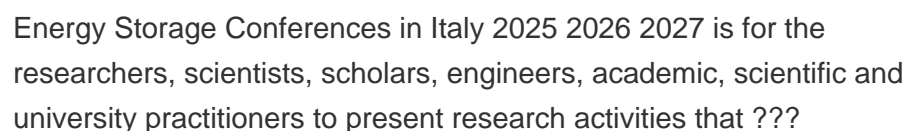

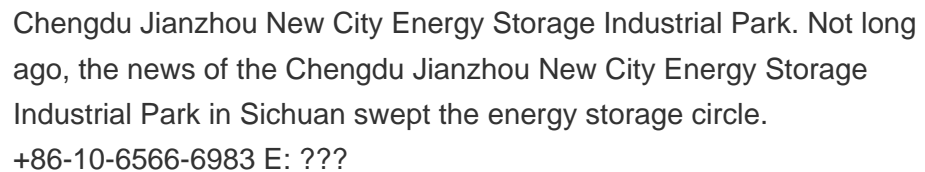

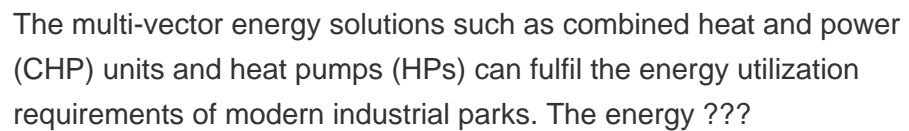

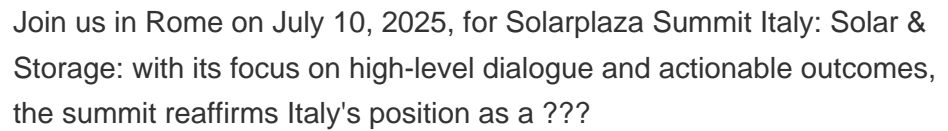

What are Italy's energy goals? Italy's ambitious energy goals,outlined in the National Integrated Energy and Climate Plan (PNIEC),mark a transformative shift toward renewable energy. By 2030,the country is targeting 28GW of wind power and nearly 80GW of solar capacity,making energy storage essential for ensuring grid stability and maximizing renewable integration.

How much energy does Italy need to decarbonize its energy system? According to the Italian Transmission Operator (TSO) Terna the grid needs about 71 GWh of new utility-scale storage capacity by 2030 for the country to decarbonize its energy system and align with EU targets. This means a massive deployment of around 19 GW of large-scale energy storage capacity by 2030.
