

# IRAN ELECTRICAL CABINET COOLER

---

Are cabinet coolers a good choice for a control panel? Our Cabinet Coolers are ideal for all NEMA 4/4X (IP56) and NEMA 12 (IP52) rated panels. They can be easily mounted in minutes through a standard knockout hole and locking ring. Streamtek shares your concerns about maintaining a clean environment and consistent temperatures in electrical control panel cabinets.

What is a cabinet panel cooler made of? It is constructed of Stainless Steel (Type 303) for long life in wet environments. NEMA 12 (IP52) ??? Cabinet Panel Coolers (oil-tight, dust-tight) are used in industrial environments where no liquids can come into contact with the unit. It is constructed of Stainless Steel (Type 303) to withstand harsh corrosive environments.

What is a NEMA 4 panel cooler? NEMA 4/4X (IP56) ??? Designed for Electronic Control Panels ??? Splash resistant, oil-tight, and dust-tight for use in washdown environments as well as outdoor use. When the Vortex Tube Panel Cooler is not operating, a low-pressure relief valve closes and seals to maintain the integrity of your NEMA 4 cabinet enclosure.

How does a cabinet enclosure cooler work? (D) As the hot air from within the cabinet enclosure cooler, it exhausts through the cabinet air exhaust at a slight positive pressure. (E) The cold air enters the cabinet enclosure cooler via the cold air distribution kit. Holes are drilled into the tube to supply cold air where required.

These innovative approaches to cabinet cooling systems provide solutions that are adaptable to virtually all electrical enclosure cooling requirements and ensure enclosure sealing integrity is ???
