EU Energy related Products directive (ErP) The most powerful way to combat climate change is to reduce energy consumption. The EU's target of 20 per cent energy saving for products by 2020 was not only met, but exceeded. This gave legislators and governments in Europe evidence that environmental restrictions on products work.

According to the definition of European Commission the directive is valid for products having an impact on energy consumption when used.

Energy-related products are all products using energy as well as energy-saving products, e.g. windows and certain water-saving products with the help of which water can be saved and as a result of this the
