

ISRAEL SUN POWER INVESTMENT

What is solar energy in Israel? Solar energy is heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Israeli solar energy market is segmented by technology into solar photovoltaic (PV) and solar thermal.

Does sunflower have a solar portfolio in Israel? Israel ??? with rapid growth in renewable energy investments throughout the country ??? Sunflower is leveraging its operating solar portfolio, unique knowledge in the energy storage field and Keystone Fund???s capabilities in order to execute deals.

Should Israel build solar energy plants in the Negev desert? The Negev Desert and the surrounding area, including the Arava Valley, are the sunniest parts of Israel, and little of this land is arable, which is why it has become the center of the Israeli solar industry. David Faiman thinks the energy needs of Israel's future could be met by building solar energy plants in the Negev.

Does Israel need solar water heating? As of the early 1990s, all new residential buildings were required by the government to install solar water-heating systems, and Israel's National Infrastructure Ministry estimates that solar panels for water-heating satisfy 4% of the country's total energy demand.

Is Israel a goldmine of solar power? As many countries look to cut fossil fuel use and reach ambitious zero-emissions targets, Israel is resting on a goldmine of solar power whose full potential has yet to be realized, energy experts say. Sign up to know what???s really happening in Israel. The latest headlines and stories from Ynetnews.com

ISRAEL SUN POWER INVESTMENT

Does solar water heating save oil in Israel? The Ministry of National Infrastructures estimates solar water heating saves Israel 2 million barrels (320,000 m³) of oil a year. On 2 June 2008, the Israeli Public Utility Authority approved a feed-in tariff for solar plants.

Many people are already familiar with the popular Israeli roof ornament - the dud shemesh or solar boiler is ubiquitous among Israeli households. But did you know these boilers save over two million barrels of oil every year? Solar power in ???

By investing in Israel's capital market via Israeli stocks and bonds. This is done by opening an investment account with one of the established Israeli brokerage firms, or investing through your current investment account in your country. ???

The current scope of infrastructure investment in Israel is lower than comparable countries around the world. To address this gap, the Israeli government is planning large scale infrastructure projects across almost all industries, and publishes annually the Infrastructure for Growth workplan, a national infrastructure strategy consolidating
