

# ITALIAN OFFICE BUILDINGS WILL USE ENERGY STORAGE CONTAINERS

Does Italy need an efficient energy storage system? These targets cannot be achieved without implementing an efficient energy storage system in Italy. Italy's growing need for storage systems is particularly evident in Central and Southern Italy, where a large number of renewable energy plants have been installed.

Can Italy make battery storage projects commercially attractive? Italy has a clear need for storage, and the enabling market and regulatory mechanisms are being put in place to make battery storage projects commercially attractive. CIP's Flagship Fund CI V, completed in March 2025, exceeded its 12bn (\$12.9bn) target.

Are energy storage facilities regulated in Italy? The Italian regulatory framework concerning energy storage facilities has been evolving rapidly in recent years. However, the legislation is relatively fragmented, given the high number of laws governing different aspects of energy storage facilities.

What laws govern storage facilities in Italy? These are: specific ARERA resolutions, the Italian Unified Text for Active Connections or TICA (Testo Integrato delle Connessioni Attive) issued in 2008 by the same ARERA, and other regional and national laws regulating storage facilities.

Is MACSE a business case for grid-scale storage in Italy? The CM and a new energy storage-only auction scheme called MACSE are set to form the bedrock of the business case for grid-scale storage in Italy, something that consultancy Timera Energy's director for power market services Steven Coppack said made it unique in Europe (Premium access).

Why is CIP launching large-scale battery projects in Italy? The development of large-scale battery projects aligns with CIP's growing focus on energy storage. With Italy's supportive regulatory environment, the partnership aims to leverage CIP's expertise to advance its storage infrastructure projects. The move also supports Italy's aim to meet the nation's 2030 renewable energy targets.

In 2024, Italy's energy storage market saw remarkable progress, with a 24.6% rise in the number of storage systems and a 30.4% increase in total rated power, reflecting the growth of larger, more efficient installations. To maintain grid

Over the 15 years Module-T has been established, we have developed an exciting range of prefabricated buildings. Our modular construction range includes hangers, office buildings, accommodation containers, WC and sanitary

The MACSE auction will provide 15-year contracts for energy storage projects whereby they will be paid annual premiums to cover operating costs in exchange for making their capacity available on the Dispatching

The upcoming MACSE auctions, a mechanism introduced by Terna, Italy's electricity transmission system operator, to procure energy storage capacity, are poised to drive exponential growth in
