

# JAMAICA INDEPENDENT ENERGY STORAGE PROJECT BIDDING

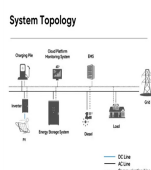

What does Jamaica's energy procurement mean for the future? ???This procurement signifies a step toward a cleaner and more sustainable energy future for Jamaica,??? GPE said in the tender document. The 100MW to be supplied would grow renewables from 187MW or 12 per cent of Jamaica's total electricity grid to 287MW or about one-third of the grid.

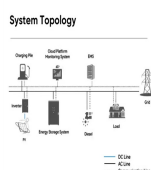

Does JPs have a solar project? JPS, the state-owned utility company, recently announced the auction for various solar, battery, and wind projects. The projects include a 115 MW solar plant, multiple battery energy storage systems (1 to 50 MW each, totalling 171.5 MWh), and a 12 MW onshore wind facility.

How are renewable firms assessing business opportunities in Jamaica? ???The market is looking at both strategies ??? distributed power and at the utility-scale,??? she said regarding how renewable firms now assess business opportunities. Most of Jamaica's energy is generated from liquefied natural gas and oil, which make up 88 per cent of the energy grid. Renewables account for the other 12 per cent.

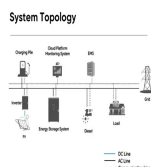

How long does a solar project last in Jamaica? Solar projects must be operational within 24 months, while others have up to 30 months. Successful bidders will enter into a 20-year power purchase agreement with the Jamaica Public Service Company. The bid submission window is from January 25, 2024, to February 1, 2024. Loading

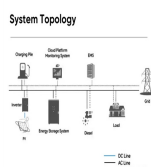

What is Jamaica's energy source? Most of Jamaica's energy is generated from liquefied natural gas and oil, which make up 88 per cent of the energy grid. Renewables account for the other 12 per cent. ???This 12 per cent can be further divided into wind power at 6.0 per cent, solar power at 3.0 per cent, and hydro power at 3.0 per cent,??? stated GPE.
