

JERSEY CEEC ENERGY

Who is Jersey Electricity plc? Jersey Electricity plc is a vertically integrated power utility dealing in the importation, generation, transmission and distribution of electricity. We serve around 50,000 domestic and commercial customers. Providing affordable, secure and sustainable energy is our core objective. Our vision is to inspire a zero-carbon future.

What is Jersey Electricity Group? Jersey Electricity Group consists of several complementary businesses beyond energy supply. Find out what else we do. A low carbon future is within our power. And it's projects like these that will ensure a robust, reliable, low-carbon, sustainable electricity supply for generations.

Where does Jersey's electricity come from? Around 95% of the electricity we supply is imported from low carbon, hydro (34%) and nuclear (66%) sources in France through three undersea supply cables. These cable links have given us the ability to virtually completely de-carbonise Jersey's electricity supply.

How does Jersey de-carbonise its electricity supply? These cable links have given us the ability to virtually completely de-carbonise Jersey's electricity supply. The remainder of our electricity comes from the Government-owned Energy from Waste Plant and since 2019 some on-Island solar PV generation.

Who are Jersey Energy? Jersey Energy are specialists in energy auditing and surveying. They are also experts in commercial strategies towards energy efficiency and the only certified BREEAM assessors within the Channel Islands. They offer low energy, efficient, and cost-effective solutions tailored to your requirements. Jersey Energy is not Jersey Gas.

When was Jersey electricity company founded? The Jersey Electricity Company was founded in April 1924, with a small generating station at the end of Albert Pier. Within a decade it had moved to a new, bigger power station at Queen's Road, the site of today's Powerhouse retail park and
