The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather resistance, strength, and stiffness of the bracket. First, there are many fixing methods, such as pile foundation method (direct burial method), concrete block weight method, pre-embedded method, ground ???

The factory is divided into extrusion aluminum manufacturing and photovoltaic bracket, solar energy frame finishing products. Three factories manufacturing solar products covering a total area of 100,000 square meters. Want to Know More? All standard packages are also available for OEM, energy-efficient, and smart PV mounting solutions

1. A photovoltaic bracket is a bracket, such as a solar photovoltaic bracket, which is a special bracket designed for placing, installing and fixing solar panels in a solar photovoltaic power generation system. 2. Photovoltaic brackets can be divided into aluminum alloy brackets, steel brackets and concrete brackets according to their materials.
