

# LAOS SUNGREEN ELECTRIC

---

How much electricity will Laos produce by 2030? These developments will support government efforts to increase the amount of energy exported and minimize the amount of electricity re-imported from neighboring countries in the dry season. By 2030, it is planned that Laos will produce another 5,559 MW of electricity.

Why is solar energy important in Laos? Laos is undergoing rapid socio-economic changes and the provision of sufficient energy is an important factor in the response to continuing development. "Given recent advances in solar energy in Laos, it has become clear that more and more local and foreign businesses are interested in investing in this field," Daovong said.

Should China and Laos cooperate in energy cooperation? Jiang added that room for energy cooperation between China and Laos is not limited, but both countries should avoid exceeding grid capacity, in order to promote the benign development of Laos' power industry and ease the pressure of business operation.

How many solar power plants are in Laos? VIENTIANE, Feb. 1 (Xinhua) -- A total of 58 solar power plants have been completed or under construction across Laos with a total installed capacity of 7,656 MW, local daily Vientiane Times reported on Tuesday. Eight of these plants have been completed and 50 are under construction, said the report.

What is Chaleun Sekong Energy Company Limited doing? Chaleun Sekong Energy Company Limited is investing in developing and generating hydropower electricity in 11 hydropower dams, in that, 6 dams have already been generating electricity, 4 dams under construction and the other 1 dam is in development phase.
