Will Laos build a wind park? Wind park. Author: Santi Villamar?n. License: Creative Commons,Attribution-NoDerivs 2.0 Generic. The government of Laos and two investment firms will pour some USD 2.15 billion (EUR 2.16bn)into the construction of a 1.2-GW wind farm in the Southeast Asian country,the Laotian Times reports.

Does Vietnam have a wind farm? The electricity generated by the wind farm will be supplied to Vietnam under a 25-year power purchase agreement signed between IEAD and Vietnam Electricity in 2021, which was amended in January 2022. The plan for importing power produced from the wind farm to Vietnam???s grid was approved in July 2022 by the prime minister of Vietnam.

What is ies doing in Laos? IES is working on this project in Sekong and Attapeu provinces,with plans to have the wind power complex up and running by 2025. The trio envisages taking on other renewable energy projectsin Laos,including solar and biomass. IES has more than 1,900 MW of wind and solar assets in development and operation in Thailand,Japan,Laos and Vietnam.

Where can IEA develop a large-scale wind power project? Based on the preliminary feasibility study,IEA identified Dak Cheung District in Sekong and Sanxay District in Attapeuas the most promising locations for a large-scale wind project. The Project Development Agreement executed between GOL and IEA confirmed IEA's exclusive rights to develop the Monsoon Wind Power Project.

The Sekong Wind Farm (Sekong Wind Farm\_Phase I), will have 110m high towers. The Sekong Wind Farm (Sekong Wind Farm\_Phase II), will have 110m high towers. Development status Post completion of the construction, the project is expected to get commissioned in 2025. Power purchase agreement
