

LATVIA ELECTRI SOLAR

What is the largest solar park in Latvia? This will be European Energy's first project in Latvia and the largest solar park in Latvia. The Turgale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.

Does Latvia have solar energy? So far, however, the development of solar energy in the country has been rather limited. According to Latvia's grid-operator Sadales tīkls AS, which is a subsidiary of Latvenergo, there was just 1.3 MW of renewable energy power installed under net metering at the end of 2016.

Which energy sources are used in Latvia? Latvia has underground gas storage facilities at the Inčukalna UGS, with a capacity of 4.47 billion m³. Natural gas companies include Latvijas Gāze. Renewable energy includes wind, solar, biomass and geothermal energy sources. Almost half of the electricity used in the country is provided by renewable energy sources.

What is European energy doing in Latvia? European Energy started developing renewable energy projects in Latvia in 2021, and with the opening of its office in Riga, four employees have joined the company in Latvia to develop a strong pipeline of renewable energy projects in the country.

Padua, Italy, July 12, 2021 (Solar Business Hub) - FuturaSun announces the completion of a solar PV project by AJ Power for Danish company M.P. Socks SIA at its manufacturing facility in Latvia, featuring 708 FuturaSun Silk Pro 370 monocrystalline PV modules with a total capacity of 262 kW mounted on the ground and roof.
