Automated Storage & Retrieval System (ASRS) Automated Storage and Retrieval Systems (ASRS) are technologically transforming traditional warehouses into powerhouses of efficiency. Orchestrating the movement of products, materials, and inventory with speed, precision, and accuracy, the days of manual labor and costly errors are behind you.

LEBANON AUTOMATED STORAGE SOLUTION

Depending on the number and size of storage units (SKUs), product types, temperature requirements, productivity requirements and economic feasibility, the most suitable storage types for the facility are determined. There are several storage solutions that work best within manual, semi-automatic or fully automated systems.

Modula's automated storage solutions, specifically designed for cleanrooms and temperature-controlled environments, offer precise control over environmental conditions, crucial for sensitive materials like APIs, ensuring they are stored in optimal conditions to prevent contamination and preserve efficacy.

The fully automated storage solution is based on special warehouse management software that controls all operations related to the storage of small items in specified bins. The solution is comprised of a shelf system with one or several aisles, and each aisle is equipped with a robotic stacker or vertical crane retrieval device.

Request A Quote For Automated Storage and Retrieval Systems .
