

LITS ENERGY KAZAKHSTAN

What is the main energy publication of the Republic of Kazakhstan? The main energy publication is the annual Fuel and Energy Balance of the Republic of Kazakhstan. It contains annual data on energy supply and demand in physical and energy units with sectoral breakdowns, as well as energy intensity indicators.

What is energy in Kazakhstan? Energy in Kazakhstan describes energy and electricity production, consumption and import in Kazakhstan and the politics of Kazakhstan related to energy. Kazakhstan is net energy exporter. Kazakhstan has oil, gas, coal and uranium reserves. Kazakhstan is a leading energy producer in the Commonwealth of Independent States (CIS).

How much oil does Kazakhstan produce? It produces more than twice as much crude oil as Azerbaijan but around half the natural gas produced in Turkmenistan. Kazakhstan's total energy production (178 million tonnes of oil equivalent [Mtoe] in 2018) covers more than twice its energy demand. Kazakhstan is also a major energy exporter.

How many hydroelectric power plants are there in Kazakhstan? Hydroelectric power plants, 39 in total, contribute an additional 269.6 megawatts (MW) to Kazakhstan's renewable energy portfolio. These facilities, strategically located across the country, harness the kinetic energy of flowing water to generate electricity, offering a reliable and sustainable energy source for the nation.

What is Kazakhstan's energy mix? Coal represents around half of Kazakhstan's energy mix (50% in 2018), followed by oil and natural gas (both with 25% shares). Coal is mostly transformed into electricity and heat before reaching the final consumer. Coal fuels around 70% of electricity generation (in 2018), followed by natural gas (20% in 2018).
