How much does electricity cost in Sudan? As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt . In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector .

How can Sudan achieve energy self-sufficiency? Encouraging solar and wind power in the country???s energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

How can Sudan restructure its energy sector from Morocco? One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

Is Sudan's Energy Sector Sustainable? Further, Sudan???s energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures . Financial sustainability could be achieved by introducing gradual tariff adjustments.

What is the electricity situation in Sudan? The following facts highlight the electricity situation in Sudan: Electricity access rate is only 56%, which is less than the global average of 89%. The low electricity access rate, alongside frequent outages, resulted in poor utilization of electricity for productive purposes.
