to the deployment of renewable energy, particularly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m2 for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an average of 1620 KWc. This growth in renewable energy has been facilitated by state subsidies on imported

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
