

# MAIN BUSINESS OF THE NEW HONEYCOMB ENERGY STORAGE TECHNOLOGY

What are the core technologies for energy storage? At this stage, core technologies should be broken through including the screening of high temperature heat storage materials and its device design, the design and manufacture of the core component of CAES, the new material manufacture of chemical energy storage, the energy storage systems integration and energy management.

What is the White Book for energy storage industry in 2014? White book for energy storage industry in 2014. China Energy Storage Alliance 2014. China Electricity Council. The study on the development policy of energy storage industry. China Power Enterprise Management 3; 2015. p. 24??28. Global energy storage distribution: the US accounts for 40% and Japan accounts for 39%.

What is NASB energy storage project? In 2011,the first national NaSB power plant demonstration "NaSB Energy Storage Project" in "industry-university-research cooperation" mode was launched. It is designed as outdoor warehouseand the overall storage capacity is 1.2 MWh. In December 2014,the first warehouse was connected to the grid and entered into operation phase.

How to improve the commercialization of energy storage industry in China? The above problems have constrained the commercialization of energy storage industry in China. Therefore, we should take relevant measures, including reducing costs by all means, perfecting technical standards, establishing advanced benefits assessment system, and improving relevant incentive policies. 4.1. Reduce costs by all means

Is energy storage a precondition for large-scale integration and consumption? So to speak,energy storage is the precondition of large-scale integration and consumption of RES. However,China's energy storage industry is at the exploration stage and far from commercialization. This restricts the development of RES to certain

# MAIN BUSINESS OF THE NEW HONEYCOMB ENERGY STORAGE TECHNOLOGY

---

extent. For this reason, this paper will concentrate on China's energy storage industry.

# MAIN BUSINESS OF THE NEW HONEYCOMB ENERGY STORAGE TECHNOLOGY

114KWh ESS

What is the role of FB Technology in energy storage? Its high-capacity characteristic makes it play an important role in the grid connection of RES. VRFB and ZnBrFB technology are the two important directions of FB technology in large-scale energy storage .

114KWh ESS

According to the agreement, Honeycomb Energy will lead the industry chain enterprises to invest in the construction of the Honeycomb Dazhou Lithium Battery Industrial Park, aiming to build a resource-material ???

? 1/4 ?Honeycomb Energy Technology Co., Ltd? 1/4  
?2018212,8899,????????????????? ???

The project seizes the "dual carbon" opportunity, takes key energy storage technologies as the core, integrates R& D, sales, manufacturing and services, aims to promote the strategic layout ???
