

# MALI BEN GURION NATIONAL SOLAR ENERGY CENTER

It is also the burial site of David Ben-Gurion, Israel's first prime Minister and a great believer in the potential of the desert. Because of its high desert location, 430 m above sea level, the winter ???

Graduate Research Positions Print Positions in a broad range of energy-related research are given below; motivated candidates are requested to contact directly the PIs:

LOCATION NOTE: The name of the town is Midreshet Ben-Gurion, or "the Midrashah", this is the name on the map, on Waze and where to get off the bus if coming by public transportation. The symposium is inside the Midrashah, part of Ben-Gurion University's so-call "Sede Boqer Campus". However, it is not part of Kibbutz Sede Boqer.. We will be operating a shuttle between the city ???

The Ben-Gurion National Solar Energy Center at Midreshet Ben-Gurion is the national alternative energy research institute of Israel. It was established in 1987 by the Ministry of National Infrastructures to study promising alternative and clean energy technologies, particularly those involving solar power. Since July 1991, the center has been operated by Ben-Gurion University of the Negev's Jacob Blaustein Institutes for Desert Research

Adi Vital Kaplun z"l was an exceptional student, and in her honor, we have chosen to name our Best Poster Awards after her. Adi earned her M.Sc. in Environmental Physics and Solar Energy from the Albert Katz International School at the Jacob Blaustein Institutes for Desert Research, Ben-Gurion University of the Negev's Sede Boqer campus, graduating with outstanding honors.

Faiman's theoretical physics research focused on hadron spectroscopy using the quark model and various associated symmetries. His solar energy research spanned studies of solar radiation, energy conversion devices, and power-producing systems. His most celebrated work was the development, in collaboration with the Zenith Solar Company, of a 10 m2 mirrored, sun ???

# MALI BEN GURION NATIONAL SOLAR ENERGY CENTER

At the Ben-Gurion National Solar Energy Center, scientists are experts in concentrated photovoltaics (CPV) that focus light up to 15,000 suns into small, highly efficient photovoltaic (PV) modules. At the Ilse Katz Institute for Nanoscale Science and Technology, researchers are exploring new PV materials.

We are pleased to announce that planning is underway for the 24th Sede Boqer Symposium on Solar Electricity Production, organized by the Ben-Gurion National Solar Energy Center at the Jacob Blaustein Institutes for Desert Research, on Ben-Gurion University's Sede Boqer campus. The symposium will focus on a range of fascinating topics, including novel

The name of the village is actually "Midreshet Ben-Gurion". The name of the bus company is "Metropoline" and they operate two bus-lines, numbers 60 and 64, which come directly to the Campus at Sede Boqer (one should ask for tickets to "Midreshet Ben-Gurion"), and it's about a 45-minute ride. PARKING:

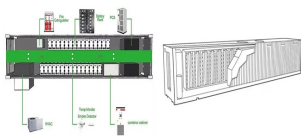

In recent years, big efforts have been made to develop clean energy technologies that will replace fossil fuels and supply the increasing global energy demand without contaminating the environment. One of the approaches that has been developed for more than 100 years is the utilization of exo-electrogenic bacteria as electron donors in microbial fuel cells (MFCs).
