

MAXEM ENERGY SOLUTIONS B V SAINT MARTIN

What makes Maxem a sustainable e-mobility solution? We strongly believe in a sustainable future without barriers. That is why we have developed Maxem: the combination of hardware and cloud solutions that enable you to install e-mobility and sustainable energy at scale. Maxem regulates car charging and solar power and provides you with the control needed to lower your energy costs.

What is Maxem energy cloud? Maxem Energy Cloud has been developed to manage your location as a whole- including your charging points, stationary battery, solar energy and grid connection. Result: the behavior of your charging points, battery & sustainable generation optimally coordinated with each other and the energy network.

What is a Maxem energy controller? The Maxem Energy Controller has been developed to deal with this. Maxem Pro measures up to 15 nodes in your building, including grid connection, sub-distributors and generated solar energy. Maxem Energy Controller offers hardware control of your charging points, and takes all capacity restrictions into account.

How does Maxem work? Maxem regulates car charging and solar power and provides you with the control needed to lower your energy costs. Start today with a greener future. Introduce e-mobility and sustainability at your location - and scale it with Maxem.

Why should you invest in Maxem energy controller? The investment will be used, among other things, to increase the team and further develop the Maxem Energy Controller, for both the residential and industrial market. This makes it possible to better control and connect steerable energy consumers, such as charging points, solar panels, batteries and heat pumps.

MAXEM ENERGY SOLUTIONS B V SAINT MARTIN

Is Maxem energy cloud a white-label EV charging & energy management platform? Amsterdam, February 1, 2022 - Maxem Energy Solutions, the developer of the white-label EV Charging (CPO) and Energy Management (EMS) platform, Maxem Energy Cloud, closed an investment round of 1 million euros in January. ??? The continued investment from existing shareholders V2 Capital B.

St Martin Solutions was established and registered in France in 2007 to offer services to private owners in Saint Martin de Belleville and the surrounding villages. We are a well-known, established local business with a proven track ???

Door slim om te gaan met duurzaam opgewekte en opgeslagen energie zorgen we ervoor dat woningen en bedrijfslocaties duurzaam en zelfvoorzienend worden. Met de ontwikkeling van Maxem Energy Cloud en in combinatie met de ???

With the Maxem Energy Controller you do not have to worry about expensive grid reinforcements. The system uses advanced algorithms and measurement data to optimize energy consumption on site. By intelligently controlling energy, the ???
