Regenerative braking systems (RBSs) are a type of kinetic energy recovery system that transfers the kinetic energy of an object in motion into potential or stored energy to slow the vehicle down, and as a result increases fuel efficiency. These systems are also called kinetic energy recovery systems. There are multiple methods of energy conversion in RBSs including spring, flywheel

The Mercedes-Benz GenH2 Trucks, which are used in these first customer trials offer a payload of approx. 25 tons at a gross combination weight (GCW) of 40 tons. Two special liquid hydrogen tanks and a particularly powerful cellcentric fuel-cell system enable this high payload and long range.

Mercedes-Benz Energy, part of the large automotive OEM, has expanded its range of second life energy storage partnerships into India through a 50MWh per annum module supply deal with local firm Lohum. The two companies announced a strategic partnership with a 50MWh per annum multi-year supply agreement yesterday (4 January). It is Mercedes-Benz

??? Mercedes-Benz is committed to the all-electric future of mobility, and at the same time more and more people are opting for an electric vehicle or a plug-in hybrid as a way of doing their bit for the environment. But what is the best way to handle the vehicle's electrical capabilities? To help answer this question, Mercedes-Benz has now launched the Eco Coach ???

The supersystem of the flywheel energy storage system (FESS) comprises all aspects and components, which are outside the energy storage system itself, but which interact directly or indirectly with the flywheel. This chapter covers the basics of hybrid vehicle technology and presents relevant architectures as well as primary and secondary energy storage options.

Automotive OEM Mercedes-Benz entered entered the stationary energy storage market in 2016, marketing a range of primarily residential solutions in Europe and the US, but that fizzled out as CEO Gordon Gassmann explains. "We have tried a few approaches since 2016 and the core of our business has always been focused on second life batteries.
