Minergy Power Corporation reflects our mission to provide reliable,
sustainable energy solutions that enhance the quality of life. We believe
that access to clean and efficient energy is a catalyst for positive change,
driving economic growth, education, and overall well-being.

With our Glass Aggregate Technology, Minergy is helping paper mills,
power plants, and municipal wastewater processors meet their long-term
sludge disposal and environmental goals. By recycling the sludge into
renewable energy and glass aggregate instead of placing it in a landfill,
the Fox Valley Energy Center preserves 10 acres of green space

MINERGY POWER CORPORATION is a leading power generating
company based in Pasig, Metro Manila. We specialize in providing reliable
and sustainable energy solutions to meet the growing demand for power
in the Philippines. Our state-of-the-art facilities are equipped with
cutting-edge technology and operated by a team of highly skilled

Since the start of MINERGY's establishment and 1 st commercial
operation in 1995, generation was largely driven by fossil fuels, particularly
bunker and diesel oil.. Under the Diesel Business Unit, MINERGY
constructed two Diesel Power Plants, the 18.9 MW Sulzer Diesel Power
Plant and the 27.4 MW Wartsila Diesel Power Plant both located in
Tablon, Cagayan de Oro City.

Minergy Corporation Minergy specializes in the vitrification, or melting, of waste materials. Minergy has successfully commercialized technologies for recycling high-volume wastes, including auto shredder residue, mine tailings, municipal sludge, paper mill sludge, and contaminated sediment and soils, into reusable, inert glass.

Glass Aggregate Technology is Minergy's initial vitrification technology and has been in commercial operation since 1998 at the Fox Valley Energy Center, previously Minergy's Fox Valley Glass Aggregate Plant (FVGAP). At the heart of the technology are two (2) 7-foot-diameter cyclone furnaces in which sludge is co-fired with auxiliary fuel

??? Performed outstanding work line ups on day-to-day activities for a safe and efficient operation on coal ship unloading, conveying, stacking, reclaiming and diesel fuel unloading, operations. & It;br& gt;??? Skilled in problem solving and ability to handle in high pressure environments along with meeting projects schedules under tight deadlines. & It;br& gt;??? ???

Antigua and Barbuda: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. Nuclear power ??? alongside renewables ??? is a low-carbon source of electricity. For a number of countries, it makes up a large share of electricity production.
