Nuclear energy is not new to Jamaica. The country's first nuclear research reactor, SLOWPOKE-2, a pool type reactor designed by Atomic Energy of Canada, was installed at The University of the West Indies (UWI) Mona campus back in 1984 and has been used in research in several areas. It is the Caribbean's first and only nuclear reactor.

This will represent a significant increase in wind power in the province, adding to the ~258 MW currently being generated by two existing wind projects (the St. Leon Wind Farm and the St. Joseph Wind Farm). The Manitoba Affordable Energy Plan also calls for the creation of an Indigenous loan guarantee program.

Context Costly, imported fossil fuels are used to meet 90% of Jamaica's energy needs. Jamaica has set an ambitious target to generate 30% of its energy from local renewable sources, such as hydro, wind and solar power by 2030. 36 megawatts of power 11 Vestas V112 3.3 MW turbines installed 90 kilometers west of Kingston, ???
