

# MONTENEGRO ENERGETIC COMPANY

How much electricity does Montenegro need? With around 621 000 inhabitants, Montenegro's electricity needs are mainly met by the 225 MW lignite power plant at Pljevlja and the 307 MW Perućica and 342 MW Piva hydropower plants, all run by state-owned utility Elektroprivreda Crne Gore (EPCG).

Why did Montenegro not issue energy permits? Montenegro's Ministry of Economy did not plan to issue energy permits in its Energy Licensing Plan for 2019 because the country is already close to reaching its national target of 33 percent of produced energy coming from renewable energy sources (RES) in final energy consumption. The passage does not provide information on why Montenegro did not issue permits for other reasons.

Can Montenegro reduce energy demand? Montenegro has great potential for reducing demand through more efficient energy use. According to IEA statistics, Montenegro's energy intensity has been falling slightly in recent years but is still more than twice that of the EU-28. Inefficient practices such as using electrical heaters for heating are widespread.

Can Montenegro develop hydro and thermal power plants? Montenegro has the potential to develop hydro and thermal power plants given the abundance of rivers and streams. Additionally, there is potential for some new types of production such as solar and wind energy.

What is the future of Montenegro's energy sector? Montenegro's energy sector has significant potential for growth, as it currently only uses around 20 percent of its hydro potential and consumes more energy than it produces. To fully develop this sector, Montenegro will need a developed/upgraded transmission and distribution network.
