

# MUSCAT NEW ENERGY STORAGE PILOT

Nova Scotia is one of the best places in North America to harness the power of wind. But because both wind and solar are intermittent, they require reliable back-up energy. That's where battery storage comes in. Investing in new technology is key to modernizing our power grid, helping to keep rates stable, and growing our use of renewables.

The Long-Duration Energy Storage (LDES) portfolio will validate new energy storage technologies and enhance the capabilities of customers and communities to integrate grid storage more effectively. DOE defines LDES as storage systems capable of delivering electricity for 10 or more hours in duration. LDES Pilot Program Notice of Funding
