

NALA ENERGY MARTINIQUE

Who is Nala renewables? The new company, Nala Renewables, has an ambitious target to build a portfolio of renewable energy projects with a cumulative capacity of two gigawatts to be operating, in construction or in late stage development, within the next five years.

Why choose Nala energy? At Nala Energy we provide highly flexible, reliable, long-duration energy storage systems for utilities, C&I and renewables.

What does Nala do? The Nala team has extensive expertise across the entire renewable energy value chain, from development and construction to operations. Together with our global partners, we are committed to reducing carbon emissions and meeting the increasing demand for clean power. Active Sectors and Technologies: Solar PV and Onshore Wind.

What is the Portfolio status of Nala renewables? Portfolio Status: ~50 MW total capacity, ~50 MW of tangible development pipeline. Nala Renewables is a 50/50 joint venture between Trafigura and IFM Net Zero Infrastructure Fund. Nala benefits from a global network combined with a unique business-building approach and renewable energy expertise.

What will Nala do in 2025? By 2025, Nala aims to build a global portfolio of renewable energy projects with a cumulative generative capacity of 4 GW in operations, construction, or late-stage development. Its focus is on markets in North America, Europe, Latin America, and select emerging economies.

Why invest in Nala energy storage? With Nala Energy's storage systems, utilities can rely on a cleaner, more efficient energy mix while deferring costly infrastructure upgrades. Nala Energy solutions provide utilities with a triple play value proposition: infrastructure upgrade deferral,
