

NAMIBIA SOLAR POWER TURBINE

APPLICATION SCENARIOS

Will China build Namibia's largest solar power plant? Namibia's state-owned power utility NamPower on Monday said it had signed a contract with two Chinese firms to start building the country's largest solar power plant.

APPLICATION SCENARIOS

How will solar power benefit Namibia? The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

APPLICATION SCENARIOS

Where does Namibia's electricity come from? 28% of Namibia's generated electricity comes from fossil fuels, while 64% are from hydropower, and about 8% come from renewables. Non-electricity off-grid renewable energy projects include the small/micro wind energy installations used for water pumping, which are very common in Namibia, especially on farms.

APPLICATION SCENARIOS

Is Namibia a good place to install solar power? With these conditions, Namibia has a huge potential for installing solar water heaters, solar photovoltaic (PV) systems, and concentrated solar power (CSP) plants. Namibia's most common PV technology application is solar PV-based pumping, which is mainly used in cattle farms.

APPLICATION SCENARIOS

How much solar radiation does Namibia have? The country's average high direct solar insolation is 2200 kWh/m²/year, with a cover of minimum clouds. The southern region of Namibia experiences -on average- 11 hours of sunshine/day, and an average direct solar radiation of 3000 kWh/m²/year.

NAMIBIA SOLAR POWER TURBINE

APPLICATION SCENARIOS

What are the solar conditions in Namibia? The solar conditions in the Namibian region are to be considered of the best worldwide for solar generation . The country's average high direct solar insolation is 2200 kWh/m² /year, with a cover of minimum clouds .

APPLICATION SCENARIOS

InnoSun ??? one of the first movers in the market ??? is aiming to surpass the country's goal of achieving a 70% renewable energy mix by 2030 through the establishment of utility-scale solar PV and wind power plants.

1 ? These solar projects are part of a broader strategy outlined in Namibia's National Integrated Resource Plan (NIRP) 2022, which aims to enhance the country's renewable energy capacity. This comes as Namibia generates 40% of its electricity locally through the Ruacana ???

energy in the country. Solar Energy Namibia has one of the best solar regimes in the world with an average high direct insolation of 2,200 kWh/m²/a and minimal cloud cover. The An aerial view of the Omburu solar power plant and the Omburu sub station. FIGURE 5: Solar PV array of Namibia's largest solar-diesel hybrid

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant ??? a 4.5 MW plant ??? which represents one percent of the country's current production of energy.

Blessed with 300 days of sunshine per year and offering a climate well-suited for solar generation, Namibia represents a viable solar energy market. Currently, an estimated 60% of Namibia's power is imported from ???

Energy Catalyst Country Guide: Namibia 7 Solar energy Namibia has one of the greatest solar resources in the world. Being a large country with a low population density, land is readily available. In terms of insolation, Figure 3 illustrates the high resource potential in Namibia. Averaging between 5 and 6 kWh/m², the

The future of solar technologies in Namibia does not only depends on the implementation of photovoltaic and concentrated solar panel, but also on the various ways of acquiring the energy. The acceptance and widespread of solar technologies is crucially influenced by the combined effect of research funding and government incentives.

China is the largest producer of solar power in the world, both in terms of solar panel production and installed solar capacity. According to the International Energy Agency (IEA), China accounted for more than 40% of global solar panel production in 2020, and it has consistently ranked as the world's largest producer of solar panels for several years.

The Ministry of Mines and Energy is renowned as performance driven. By promoting, facilitating and regulating development and sustainable utilization of Namibia's mineral, geological and energy resource through competent staff, innovation, research and stakeholder collaboration in a conducive environment for the benefits of all Namibians and the world.

15 ? Windhoek, Dec 19 Namibia has allocated 330 megawatts (MW) of solar photovoltaic (PV) capacity for procurement and implementation as part of its 2024 ministerial plan, the country's Ministry of Mines and Energy announced Thursday. Minister Tom Alweendo said in a statement that the
