shares. Thus, it's crucial to find an optimal balance between wind and solar energy for Tamil Nadu's power system. The findings also underscore the importance of increasing the state's energy storage capacity, introducing favorable conditions for compensating renewable energy generators and providing incentives for demand shifting. The higher

Wind speeds tend to be higher offshore than on land. A wind turbine operating at a wind speed of 24 kph can generate twice as much energy as a turbine operating at a wind speed of 19 kph (American Geosciences Institute, 2023). The wind offshore tends to be more consistent, with higher power capture for a greater number of hours per day.
