In EVE Online the energy weapons use focusing crystals that give you the trade-offs of range vs damage that other weapon classes get due to mass/explosive yield. Each crystal results in a specific color beam even though all of them are named after non-visible light bands. Necrons could just pop a different crystal in for that sweet sweet glow.

Of course it is used to represent the flow of energy from the power source to the things it powers and the shifting patterns of energy within said power source. What else would it be? Since those patterns are actually a reflection of the Necron's thoughts, visible changes to core-flux patterns are the Necron equivalent of facial expressions.

Special systems must be brought online to revive the most ancient and powerful of the Necrons" warmachines. Once activated, the Energy Core provides the necessary power to empower the Monolith for combat, and enable the use of the Shards of the C"tan. The Energy Core is the Tier 4 research building for the Necrons. Despite the name, it does not generate any Power resource ???

this will be the first time i paint minis, so i have no experience choosing paints etc. im envisioning silver necrons, not bright shiny silver but also not too dark, with red energy instead of the usual green. basically like this, but a bit lighter en without the weathering for the silver en brighter red for the energy.. i was thinking this black primer from armypainter as primer.
