

NEW ZEALAND EDEN SOLAR POWER

Does New Zealand have solar power? Solar power in New Zealand is increasing in capacity, despite no government subsidies or interventions being available. As of the end of April 2024, New Zealand has 420 MW of grid-connected photovoltaic (PV) solar power installed, of which 146 MW (35%) was installed in the last 12 months.

How many solar installations are there in New Zealand in 2022? In 2022, New Zealand had a record amount of distributed solar generation installed (68 MW). In the first few months of 2023, the rate of installation growth slowed somewhat. However, distributed solar installations are expected to increase, with Transpower forecasting 535 MW by 2030.

How can solar power help New Zealand? We're working with the sector on New Zealand's renewable energy and low emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

How much solar will New Zealand have in the next 12 months? If current trends continue for distributed solar installations, of around 4 MW per month, the addition of these two large solar farms could see as much as 120 MW of new solar generation added in the next 12 months. This would increase New Zealand's solar capacity by nearly 50 percent.

How much does a solar system cost in New Zealand? In 2009, the average turnkey price for a standard PV system of three kilowatts (kW) was about NZ\$40,000; by 2019 this had dropped to approx. NZ\$8,500. As of the end of December 2023, 56,041 solar power systems had been installed in New Zealand.

What is the average solar power system size in New Zealand? For new installations added in December 2023, the average residential system size was 6.1 kW and the average commercial system was 46.9 kW. The largest solar power system on a school in New Zealand was officially opened in a

NEW ZEALAND EDEN SOLAR POWER

ceremony in February 2019 at Kaitaia College.

NEW ZEALAND EDEN SOLAR POWER

With our 3kw Solar Mid system (using Canadian Solar panels) you could expect to generate approximately 3900kwh per year and approximately 7000kwh with our 5.3kw Solar Max system. If you want to reduce your power bills in an environmentally friendly way then talk to us about a solar solution for your Christchurch home or business.

It'll offer to install solar with no upfront costs to you. The system has a battery so you won't rely so much on grid power during the evening, and it'll replace the battery when it conks out. You'll pay for the system for the next 25 years (at which point the system will probably be due for replacement), but you'll start saving on
