Institutional Investing in Infrastructure (i3): article extract. Although the sweeping tide of BESS development is encouraging and necessary to meet net-zero goals, BESS sourcing, manufacturing and deployment also comes with its own set of societal and environmental impacts that need to be considered if the renewable-energy transition is to be as just and sustainable ???

Battery electricity storage is a key technology in the world's transition to a sustainable energy system. Battery systems can support a wide range of services needed for the transition, from providing frequency response, reserve capacity, black-start capability and other grid services, to storing power in electric vehicles, upgrading mini-grids and supporting "self-consumption" of
