NORFOLK ISLAND SUNFLOW ENERGY

Norfolk Island is a tiny island (3,455 hectares) in the South Pacific Ocean. While an Australian Territory, it's much closer to the Kiwis than us ??? approximately 1,400 kilometres directly east of Evans Head in NSW compared to around 760 kilometres from NZ's Cape Reinga.

NIRC was successful in securing \$5.25 million dollars from the Commonwealth of Australia for the purpose of transforming Norfolk Islands energy system over the next few years. Where will the money be spent? The Norfolk Island Green Energy Program includes: 1. The rollout of commercial sized solar and battery systems across multiple locations. 2.

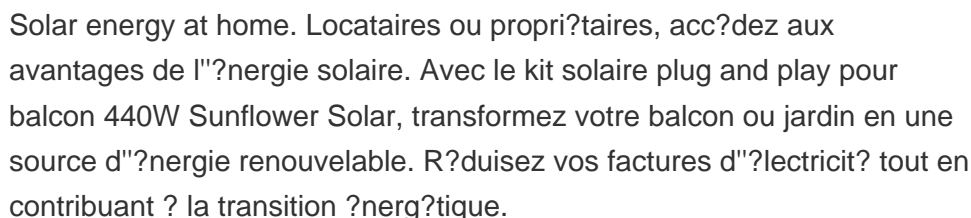

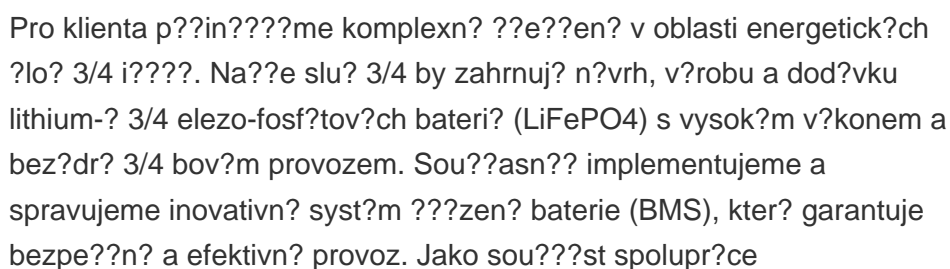

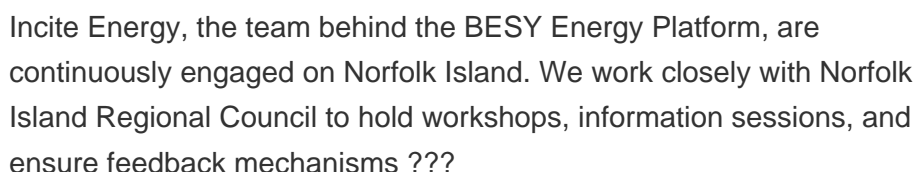

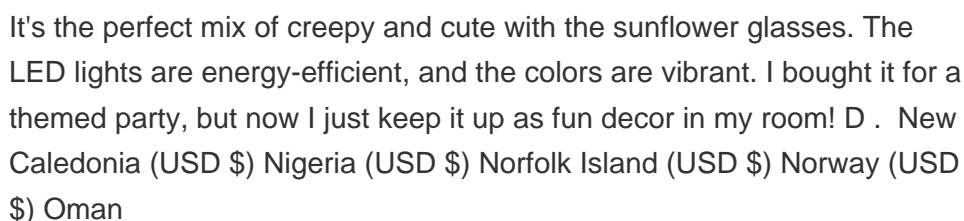

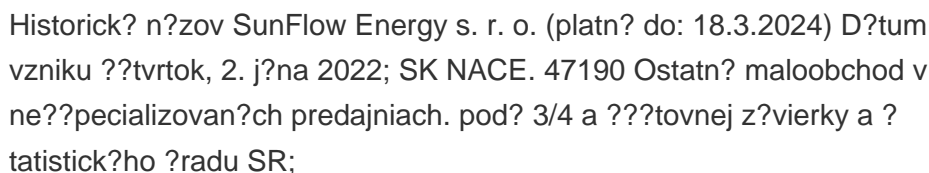

At Sunflow Energy, we strive to find the most innovative power solutions along with the ability to deliver it at the highest standards in the most timely capacity. This transition to clean and holistic energy is not going to be simple, but we believe that it can be cleaner, cheaper and will be the preferred option in the near future.

Elsewhere in Australia, Energy Bill Relief is being delivered in partnership with the Australian Government by states and territories through their existing energy concession schemes. As Norfolk Island is a non-self-governing territory, separate arrangements have been established to deliver this much-needed relief to homes and businesses on island.

Incite Energy, the team behind the BESY Energy Platform, are continuously engaged on Norfolk Island. We work closely with Norfolk Island Regional Council to hold workshops, information sessions, and ensure feedback mechanisms are in place to involve residents in the transition to a more sustainable energy future.

NORFOLK ISLAND SUNFLOW ENERGY

Norfolk County Council has been working with the Energy Systems Catapult to produce the Norfolk Local Energy Asset Representation (LEAR). The Norfolk LEAR provides a data foundation for developing the most appropriate pathway to net zero providing the robust evidence base that will guide the County Council and partners towards which clean
