

OLSON SOLAR ENERGY ECUADOR

What's going on with Ecuador's first large-scale solar power project?
QUITO, March 3 (Reuters) - Ecuador's government on Friday signed a deal with Spanish company Solarpac for the construction and operation of the country's first large-scale solar power project, with an estimated investment of nearly \$145 million.

Is there a potential for electricity generation in Ecuador? Based on what has been described, it is identified that there is a high potential for electricity generation in Ecuador, especially the types of projects and specific places to start them up by the central state and radicalize the energy transition.

Does Ecuador have an electricity market? In this research, an analysis of the electricity market in Ecuador is carried out, a portfolio of projects by source is presented, which are structured in maps with a view to an energy transition according to the official data provided.

What is the bioenergetic Atlas of Ecuador? The Bioenergetic Atlas of Ecuador developed since 2015, details the main characteristics for the use of biomass in the country's electricity generation; It considers 18.4 million tons per year of agricultural, livestock and forestry waste, from which approximately 12,700 GWh/year can be extracted.

Renewable energy is any energy source that is naturally replenished, like that derived from solar, wind, geothermal or hydroelectric action. Energy produced from the refining of biomass is also often classified as renewable. Coal, oil or natural gas, on the other hand, are finite sources. Abundant and unlimited supply!

Olson Solar Energy usually reports a 7-12 year payback for customers purchasing a solar system. Olson Solar Energy uses Tier 1 products exclusively, and although they may be slightly higher priced than some others, they are ???
