## ENERGY STORAGE

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Spain had 88MW of capacity in 2022 and this is expected to rise to 2,500MW by 2030.

By 2030, Spain expects to install 22.5 GW of energy storage projects, including included battery energy storage, pumped hydropower and solar thermal plants. The plan also aims for 76 GW of solar power, 62 GW of wind power, which includes 3 GW of offshore wind, along with 1.4 GW of biomass projects.

This points to the growing significance of utility-scale energy storage in Europe. Wood Mackenzie's forecast suggests that by 2031, cumulative installations of utility-scale ESS in Europe will reach 42GW/89GWh, with the UK, Italy, Germany, and Spain leading the utility-scale storage market.

As a strategic pivot and important hub for ocean development and international trade, large ports consume huge amounts of energy and are one of the main sources of global carbon emissions [1] ina has a vast port scale, with seven of the world's top ten ports located in China [2].The top ten seaports in China based on their annual container throughput as of 2021 ???

In summary, overseas energy storage stands as a pivotal element in revolutionizing energy consumption and management. A significant enhancer of grid resilience, it unlocks diverse economic, regulatory, and environmental benefits, bolstering global energy interconnectivity. The interdependence of various aspects, including technological

## ENERGY STORAGE

The government of Spain is launching ???280 million (US\$310 million) in grants for standalone energy storage projects, thermal energy storage and reversible pumped hydro to go online in 2026. The Ministry for the Ecological Transition and the Demographic Challenge (MITECO) opened a public consultation into the grant scheme last month seeking comments ???

The first solution is battery storage systems that enable peak shift, i.e. feeding electricity into the grid at times when the wholesale price is higher, usually before and after sunset. Fortunately, ???

Q3. What is the GST applicability on overseas transactions? The category of transactions that falls under the scope of overseas transaction under the GST regime are: Category 1: Export of goods by payment of IGST or under LUT/Bond; Category 2: Export of services; Category 3: Import of goods, which is governed by Customs Act, 1962

The global energy storage market is growing strongly. Spain, as an important member of the European renewable energy market, the energy storage industry is booming, and Spanish energy storage companies are also showing excellent competitiveness in technological innovation, product research and development, and market expansion, leading the market trend, and ???

Berg? is the leader shipping agency in Spain with more than 150 years of experience. As a maritime agent, we plan, organise and coordinate all the services a vessel needs before, during and after a port call: + Warehousing and Storage + Forwarding and Customs Clearance + Control and Inspection + Cash To Master Delivery + Others upon request.
