

## OVERSEAS ENERGY STORAGE AND POWER GENERATION DEMAND

Can emerging markets benefit from energy storage? In emerging markets around the world, there is only limited experience with energy storage, yet vast potentials exist to benefit from the technology. Many of these markets share similar energy market dynamics and needs for new resources.

What is the market for energy storage in South Asia? The market for energy storage in the South Asia region is dominated by India. (See Chart 3.4). In India,several key factors are driving the market for energy storage,perhaps most notably the ambitious National Solar Mission.

What is the future of energy storage? Chart 3.1 provides forecasts for new energy storage capacity and revenue for each of the six major developing regions identified in this report. The development of distributed and local energy resources, including renewables and energy storage, can provide significant economic growth, jobs, and a sustainable energy future in emerging markets.

Where will the new energy storage capacity be deployed? As shown in Chart 3.8,a significant portion of the new energy storage capacity expected to be deployed in Latin America and the Caribbeanwill likely come from remote power systems. Most of this new capacity is anticipated to be in physical island microgrid systems.
