

# PARAGUAY SWA ENERGY 15KW

---

How is energy sourced in Paraguay? Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

Does Paraguay have electricity? Paraguay's state-owned utility, Administracion Nacional de Electricidad (ANDE), controls the country's entire electricity market, including generation, distribution and transmission. It operates a single hydroelectric dam, Acaray, and six thermal power plants, with total installed capacity of 220 megawatts (MW).

How much electricity does Paraguay produce in 2021? In 2021, Paraguay produced a total of 40,576 GWh of electricity, marking a 24% increase from the year 2000. The country has become a significant net exporter of electricity, exporting 53.5% of its total production in the same year, which represents a 54% increase in electricity exports over the same period.

Who controls the electricity market in Paraguay? The National Electricity Administration (Administración Nacional de Electricidad, ANDE), Paraguay's state-owned utility, controls the country's entire electricity market, including generation, transmission and distribution.

Does Paraguay export electricity? The country has become a significant net exporter of electricity, exporting 53.5% of its total production in the same year, which represents a 54% increase in electricity exports over the same period. Per capita, the electricity consumption in Paraguay was 2.086 MWh in 2021, showing a substantial increase of 127% since 2000.
