

PHILIPPINES NEW ENERGY SOLUTIONS

What is the Philippine Energy Plan 2020-2040? The Philippine Energy Plan (PEP) 2020-2040 is the second comprehensive energy blueprint supporting the government's long-term vision known as Ambisyon Natin 2040. This updated plan, like its predecessor (PEP 2018-2040), reiterates the energy sector's goal to chart a transformative direction towards attaining a clean energy future.

Are there new energy startups in the Philippines? The Philippines is home to an array of clean energy game-changers, including startups, research labs, universities, media, and professional service providers. Our research identified 15 promising new energy startups, including:

How can the Philippines become an energy-secured and energy-sustainable country? Transforming the Philippines into both an energy-secured and energy-sustainable country significantly requires the leveraging of opportunities and investments, especially in technology, innovation, and competent and skilled individuals.

What is new energy nexus? New Energy Nexus calls on accelerator programs, policymakers, and funding entities alike to step up efforts to support energy startups in the Philippines, and together help achieve a 100 percent clean energy economy for 100 percent of the population. * New Energy Nexus is a founding partner of Third Derivative

How much energy does the Philippines use? Currently, renewable energy generation stands at 22%, based on data from the DoE. In 2022, installed coal capacity increased by 14%, reaching 12,428 megawatts (MW). In 2023, fossil fuel remains the main source of energy in the Philippines; and coal reliance gradually increased, from 39% in 2012 to 64% in 2023.
