If your inverter was 100 per cent efficient the largest system you could have installed under G83/1-1 Stage 1 would be 3.68kW. If the inverter had an efficiency of 92 per cent then you could have a 4kW solar PV system installed and still qualify, as $4\text{kW} \times 92 \text{ per cent} = 3.68\text{kW}$. An inverter for a 4kW solar PV system might be sized at less than 4kW.
