

POLAND'S NEW ENERGY STORAGE COMPANIES

Will EDF renewables build a second battery energy storage facility in Poland? EDF Renewables has completed the acquisition of a second battery energy storage project in Poland, with a capacity of 120 MW, increasing its total storage capacity in the country to 170 MW. Construction of the new facility will start in late 2025, with commissioning set for early 2028.

Why is battery storage important in Poland & Europe? Furthermore, this acquisition underscores the growing demand for advanced energy storage solutions across Poland and Europe. As countries accelerate their shift to renewables, battery storage plays a vital role in stabilising grids and enabling the large-scale integration of intermittent energy sources like wind and solar.

Will PGE supply ESS batteries in Poland? SEOUL, March 25, 2025 ??? LG Energy Solution announced today that it has signed an agreement with PGE, Poland's largest energy sector company, to supply 981 MWh of grid-scale ESS batteries between 2026 and 2027. Both companies will collaborate to establish a battery energy storage facility in ?>>arnowiec, Poland.

Will Poland get energy storage certification in 2029? Expected to go live by 2029, the project is the first in Poland to receive energy storage certification, marking a milestone in battery storage technology development. The European Bank for Reconstruction and Development (EBRD) invested a record ???1.4 billion in Poland in 2024, up from ???1.3 billion in 2023.

What is Poland's new energy plant? The plant, managed by Polskie Elekrownie J??drowe, is expected to reach a capacity of 3,750 MWe and will begin supplying emission-free electricity to the national grid between 2025 and 2030. The project aims to enhance Poland's energy security and reduce reliance on fossil fuels, ensuring a more stable power system.

POLAND S NEW ENERGY STORAGE COMPANIES

- ✓ ENERGY STORAGE
- ✓ Power up to 100kW
- ✓ 10-15 years life
- ✓ EMS AND BMS

How is Poland's energy system evolving? Poland's energy system is evolving rapidly, with growing demand for flexible storage solutions to balance its increasing share of renewables and decreasing share of coal-fired assets.

- ✓ ENERGY STORAGE
- ✓ Power up to 100kW
- ✓ 10-15 years life
- ✓ EMS AND BMS

The Act of 28 July 2023 amending the Energy Law and certain other acts, which implements a number of European acts in the field of energy into the Polish legal order, including the so-called Market Directive, enters into force on September 1st.

The company to deliver first grid-scale ESS batteries manufactured at its Poland facility SEOUL, March 25, 2025 LG Energy Solution announced today that it has signed an agreement with PGE, Poland's largest power producer.

As part of the latest capacity auctions of 2024, Qair has successfully secured two energy storage projects located in Kowala and Radkowice, Poland. The newly contracted capacity is 100MW.

The capacity gap can be filled by new gas-fired capacity (there are projects in the pipeline for a total of more than 3GW), coal-fired units based on a derogation in the capacity market allowing them to be used until the end of 2025.
