Does Portugal need energy storage? Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production. To this end, the country's Ministry of Energy announced on Wednesday that it has allocated €99.75 million (\$107.6 million) in a bid to support 500 MW of energy storage projects.

How much will Portugal spend on energy storage & grid flexibility? The Portuguese Ministry of Energy has allocated €99.75 million (\$107.6 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production.

Why do we need batteries in Portugal? Batteries also add to the competitiveness of our renewable energy portfolio by making solar and wind power available when they are most needed. Large-scale energy storage projects in Portugal have been relatively small in number, although 2022 saw the inauguration of a 40GWh pumped hydro energy storage (PHES) project by utility Iberdrola.

Renewable energy independent power producer (IPP) Greenvolt is close to bringing a 5MW/5MWh battery energy storage system (BESS) online at its biomass plant in Coimbra, Portugal. The firm is in the final stages of commissioning the 1-hour lithium-ion BESS at its Mondego Bioelectric Biomass Plant in Figueira da Foz, it said last week.

Portugal is looking to support at least 500MW of energy storage capacity by the end of 2025 via grant support. The country's Ministry of Environment and Energy has launched a competition for ???99.75 million ???

PORTUGAL ENERGY STORAGE INDUSTRY

In Portugal, there has been a clear strategic focus on pumped hydro storage projects ??? currently there are several pumped storage projects across the country. Indeed, Alqueva's pumped hydro storage project is one of the largest in Western Europe with a combined capacity of over 520 MW, which had an increase in its capacity since 2012.

In 2019, electricity covered 25% of total final energy demand, 56% of building energy demand and 25% of industry energy demand. Portugal has also achieved high shares of renewable energy, which covered 30.6% of gross final energy demand in 2019. This presents excellent opportunities to leverage hydropower (especially pumped storage
