

# PUERTO RICO HYBRID HOME BATTERY

---

When will a solar project start in Puerto Rico? The project, inaugurated on November 1 in Salinas, Puerto Rico, is expected to begin operations at the end of 2024. DEPCOM developed, procured, and is managing the installation of the 90 MW solar project. It includes a 51.5 MW on-site battery energy storage system (BESS).

How much money does Puerto Rico have to pay for solar? Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Will Puerto Rico reach 36% renewables by 2025? The U.S. territory could reach 36% renewables by 2025 if 3.75 GW of utility-scale solar and 1.5 GW of storage that Puerto Rico has mandated the utility PREPA to procure were constructed and interconnected by year-end 2025, which would be very rapid deployment, the national laboratories said in a report.

"The industry-leading home solar and battery system from Enphase means that Puerto Rico homeowners can put blackouts in the past," said Enrique González, CEO of Power Solar, an Enphase Platinum level
