

# QATAR KAPOLEI ENERGY STORAGE

The Kapolei Energy Storage ("KES") project is a 185 MW / 565 MWh state-of-the-art battery energy storage system that will provide clean, firm capacity to the Hawaiian Electric Company. KES will be located on approximately eight acres of land zoned for industrial use (I - 2: Intensive Industrial) within the Kapolei Harborside Industrial Project.

The state-owned electricity and water company announced last week that the deployment and grid connection of a 1MW / 4MWh Tesla Powerpack battery energy storage system (BESS) had been completed "ahead of schedule and beginning operations to benefit from it during the summer period," during which Qatar's energy demand is at its seasonal

Hawaii's Kapolei Energy Storage system represents a groundbreaking model for a reliable clean-energy grid, addressing the challenges of transitioning from fossil-fueled plants to renewable sources. The KES battery project uses 158 Tesla Megapack 2 XL lithium iron phosphate batteries, each roughly the size of a shipping container.

Rendering of how the 185 MW / 565 MWh Kapolei Energy Storage project will look. Image: Plus Power. US\$219 million of financing has been secured by developer Plus Power for the 185MW / 565MWh Kapolei Energy Storage (KES) project in O'ahu, Hawaii.

The Kapolei Energy Storage is a 185-MW lithium-ion battery project with 565 megawatt-hours. Hawaii Electric claims the project will provide grid services, grid stability, and reduced gas emissions on the island of Oahu. The Public Utilities Commission has pushed back on the project, learn
