The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather resistance, strength, and stiffness of the bracket. First, there are many fixing methods, such as pile foundation method (direct burial method), concrete block weight method, pre-embedded method, ground ???

Products Description. Residential single phase 5kw inverter can realize the independent operation of new energy photovoltaic power generation, distributed wind power generation, and small-scale micro-grid system, and can be combined with the battery system to form a grid system that can be relatively independent of the grid.
