

REFORM OF STATE-OWNED ENERGY STORAGE ENTERPRISES

What is privatization of state-owned enterprises (SOEs)? Privatization of State-Owned Enterprises (SOEs) is considered as a subset of liberalization policies, and results in a change in the ownership structure of the company.

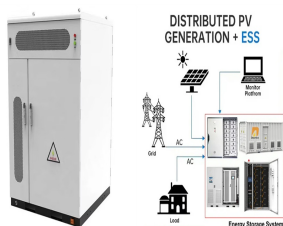

Do market liberalization and partial privatization of state-owned enterprises affect resilience? This paper explores how policies of market liberalization and partial privatization of State-Owned Enterprises (SOEs) involved in the production and provision of key inputs ??? banking, energy and telecom ??? affect the vulnerability and resilience of an economy.

How have market reforms impacted the energy sector? Overall, market and SOEs reforms in the energy sector have positively contributed to the economy ???s resilience, as they allowed energy firms to grow, invest in the expansion and upgrade of energy production and infrastructure, and meet energy security challenges posed by a high consumption rate.

Why did China maintain its SOE system? However, China ???s decision to maintain its SOE system can also be explained by the need to rely on SOEs for developmental purposes. State-led industrial development was not a priority in EU countries at the turn of the century, because of the considerable level of development achieved (Cardinale 2019b).

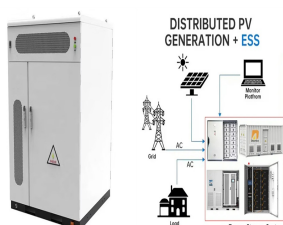

How has resilience benefited from a privatized SOE? More specifically, resilience has benefited from the increasing capitalization of partially privatized SOEs and the possibility to invest in infrastructure and other industrial assets that are critical for the economy.
