

ROMANIAN PUMPED STORAGE PROJECT PLANNING

How much does Romania spend on energy storage projects? Romania has allocated €80 million (\$87 million) under its national recovery and resilience plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of capacity. The projects are under evaluation and we anticipate the signing of the contracts in September, the minister said.

What is Romania's most important energy project? Earlier this month, Burduja reported progress on what he terms as the most important project for the Romanian energy system the 1 GW Tarnișoara-Lăpușești pumped storage hydropower plant. Romania resumed the development of the project last year, upping the planned capacity from 500 MW to 1 GW.

Does Romania have a battery energy storage plan? In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

Is Romania preparing a feasibility study for a pumped hydropower project? The Romanian Ministry of Energy said this week that state-owned energy company Societatea de Administrare Participațiilor în Energie S.A. (SAPE SA) is currently conducting a feasibility study to resume the development of the Tarnișoara-Lăpușești pumped hydropower project on the Someșul Cald River in Cluj County, northern Romania.

How will Romania grow its energy storage fleet? Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032.

ROMANIAN PUMPED STORAGE PROJECT PLANNING

Does Romania have a grant program for battery energy storage systems? The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities ??? wind, solar, or hydro. Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million).

In the summer of 2021, four South Korean companies showed interest in getting involved in the revival of the energy project to build and operate the 1,000 MW pumped storage hydropower plant

Figure 2: The plot above visualises (logarithmic scale used) the estimated discharge durations relative to installed capacity and energy storage capacity for some 250 pumped storage stations currently in operation, based ???

Romania is negotiating with the Itochu-EDF consortium regarding the construction of the Tarni??a-L??pu??te??ti pumped storage hydropower plant, according to Minister of Energy ???

Earlier this year, OPG and Northland Power proposed a first-of-a-kind project for Canada that would develop a pumped storage project at an inactive, open-pit iron ore mine. The Marmora Pumped Storage Project would ???
